SUMMARY

Software Engineer experience designing, maintaining, modernizing, and optimizing enterprise applications using C#, .NET, ASP.NET Core, SQL, Azure, and AWS. Experienced in supporting business-critical legacy systems while incrementally modernizing monolithic applications into scalable, cloud-native and microservices-based architectures. Proven track record of reducing system crashes by 40%, accelerating database workloads from minutes to seconds, and improving incident response by 50%. Strong background in backend engineering, legacy modernization, distributed systems, database optimization, and production reliability.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET, .NET Core, ASP.NET Core, JavaScript, TypeScript

Backend & APIs: RESTful APIs, Microservices, Distributed Systems, API Versioning, CQRS, Dependency Injection

Frontend: Angular, React, Next.js, HTML5, CSS3, Bootstrap, Material UI, Tailwind CSS

Databases & Data Access: SQL Server, PostgreSQL, MongoDB, T-SQL, Entity Framework Core, Dapper, Query Optimization, Indexing

Cloud & DevOps: AWS (Lambda, EC2, S3, RDS), Azure (Functions, App Services), Docker, Kubernetes, CI/CD, GitHub Actions, Azure DevOps

Architecture: MVC, MVVM, Clean Architecture, DDD, SOLID, Design Patterns, Retry & Circuit Breaker Patterns

Modernization & Integration: Legacy Modernization, Monolith-to-Microservices, Incremental Refactoring, Kafka, Redis, SignalR

Security & Quality: OAuth 2.0, JWT, RBAC, Unit Testing, Integration Testing, Production Troubleshooting

AI: LLM API Integration, Retrieval-Augmented Generation (RAG), AI-Powered Applications

PROFESSIONAL EXPERIENCE

Software Engineer — Better & Best Inc.

Oregon, WI, USA | Apr 2026 – Present

- Engineer and maintain backend services for POS, billing, and order-processing systems using C#, ASP.NET Core, AWS, and SQL, supporting reliable business-critical transaction workflows.
- Modernize legacy application components through incremental refactoring and service decomposition, improving maintainability and scalability while preserving existing business operations.
- Design RESTful APIs and AWS Lambda functions using C# and Dapper to integrate existing workflows with cloud-based services and real-time data processing.
- Optimize SQL queries, indexes, schemas, and data-access patterns to reduce latency and improve stability during peak transaction periods.
- Diagnose production bottlenecks across application, API, and database layers and implement performance and resiliency improvements.
- Collaborate with cross-functional stakeholders to deliver scalable solutions using AWS, Docker, and Kubernetes.

Software Engineer — Sahakrinpheap Microfinance PLC

Phnom Penh, Cambodia | Sep 2021 – May 2024

- Modernized legacy banking applications by decomposing monolithic components into C# and ASP.NET Core microservices, reducing system crashes by 40%.

- Designed event-driven monitoring and alerting services on Azure, improving incident response by 50% and contributing to 99% system uptime.
- Optimized SQL Server and PostgreSQL workloads through query tuning, indexing, and stored procedure optimization, reducing critical queries from minutes to seconds.
- Developed payroll and attendance systems that automated business workflows and reduced monthly manual processing time by 7 days.
- Built RESTful APIs and backend services supporting banking operations, internal applications, and third-party integrations while implementing OAuth 2.0, JWT, and RBAC security.
- Led Agile delivery and mentored junior engineers through code reviews and technical guidance, improving release cycles by 15% and reducing onboarding time by 30%.

Software Engineer — Pathmazing Inc.

Phnom Penh, Cambodia | Mar 2021 – Sep 2021

- Designed secure RESTful APIs using C#.NET to integrate enterprise applications with third-party payment services, improving transaction reliability by 30%.
- Developed backend services for ERP systems and workflow automation while supporting production workloads using Azure and Kubernetes.
- Optimized SQL queries, stored procedures, and reporting pipelines, reducing execution time from approximately 30 minutes to a few minutes.

Software Engineer — Anakut Digital Solution, Co. Ltd

Phnom Penh, Cambodia | Oct 2020 – May 2021

- Developed C#.NET backend services for POS and ERP platforms, automating workflows and reducing manual data-entry errors by 99%.
- Built RESTful APIs for system integration and real-time reporting and implemented SignalR features that improved application responsiveness by 45%.
- Applied Clean Architecture and SOLID principles while optimizing database and data-access workflows for maintainability and performance.

Software Engineer — Arrow Dot

Phnom Penh, Cambodia | Oct 2019 – Oct 2020

- Developed web applications and RESTful backend APIs using C#, .NET, JavaScript, and SQL for business-facing systems.
- Optimized database queries and application data-access patterns, improving database performance by 30%.
- Built CI/CD workflows using Git, Docker, and Kubernetes and participated in code reviews and production troubleshooting.

PROJECTS

AI-Powered Portfolio

Feb 2025

- Developed a C#.NET AI portfolio platform with RESTful APIs, MongoDB, and LLM integration, including assistant, contact, visitor tracking, resume, and health endpoints.
- Built a Retrieval-Augmented Generation (RAG) pipeline using keyword-first retrieval with semantic embedding fallback and bounded context to provide grounded responses while controlling AI API usage.
- Implemented streaming responses, dependency injection, health checks, and automated testing to improve responsiveness, maintainability, and reliability.

Angkor Milk Meal App

Sep 2023

- Optimized SQL queries and reporting features for a meal-management application serving 500+ users, improving performance and access to operational data.

EDUCATION

Master of Science in Computer Science — Maharishi International University

Fairfield, IA, USA | May 2024 – Dec 2026

Bachelor of Science in Computer Science & Engineering — Royal University of Phnom Penh

Phnom Penh, Cambodia | Nov 2016 – Nov 2020

HONORS

- Best Project & Team Effort of The Year – Khmer Care, Pathmazing Inc (06/2021)
