SUMMARY

Software Engineer with 5+ years of experience building scalable backend systems and distributed applications using C#, .NET Core, and cloud platforms (AWS, Azure). Strong expertise in RESTful API development, database optimization, and microservices architecture. Proven ability to modernize legacy systems, improve performance, and deliver reliable, secure applications in production environments.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET Core, ASP.NET Core, JavaScript, TypeScript

Frontend: React, Angular, Next.js, HTML5, CSS3

Backend & Architecture: REST APIs, Microservices, Event-Driven Architecture, CQRS, Clean Architecture, Dependency Injection

Databases: SQL Server, PostgreSQL, MongoDB, Entity Framework Core, Dapper, Query Optimization, Indexing

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), Azure (App Services, Functions), Docker, Kubernetes, CI/CD (GitHub Actions, Azure DevOps)

Integration & Messaging: Kafka, Redis, SignalR, Third-Party API Integration

Security: OAuth2, JWT, RBAC

PROFESSIONAL EXPERIENCE

Better & Best Inc.

Apr 2026 – Present

Software Engineer

Oregon, WI, USA

- Design and develop backend services and internal applications supporting POS, billing, and order management systems.
- Build RESTful APIs enabling real-time data processing and system integration across operational workflows.
- Optimize database queries and schema design, improving response time and system reliability under daily transaction loads.
- Refactor legacy components into modular, scalable services to improve maintainability and extensibility.
- Troubleshoot and resolve production issues, ensuring high availability and system stability.
- Collaborate with stakeholders to translate business requirements into scalable technical solutions.

Sahakrinpheap Microfinance PLC

Sep 2021 – May 2024

Software Engineer

Phnom Penh, Cambodia

- Re-architected legacy banking systems into scalable microservices using C# and ASP.NET Core, developing RESTful APIs and reducing system crashes by 40% while improving maintainability.
- Built and maintained event-driven monitoring and alerting systems on Azure, improving incident response time by 50% and achieving 99% uptime.
- Optimized SQL Server and PostgreSQL databases by refining complex queries, stored procedures, and indexing strategies, reducing execution time from minutes to 2 seconds.
- Designed and developed backend services for payroll and attendance systems, automating workflows and reducing processing time by 7 days.
- Implemented secure authentication and authorization using OAuth2, JWT, and RBAC, ensuring compliance and zero unauthorized access incidents.
- Diagnosed and resolved production issues through debugging and performance analysis, improving system stability and reducing downtime.
- Collaborated with architects, QA, and DevOps in Agile sprints, using Jira for sprint planning and GitHub Actions for CI/CD pipelines, which shortened release cycles by 15% and increased deployment frequency.
- Mentored engineers on backend development and system design, reducing onboarding time by 30% and improving team productivity.

Pathmazing Inc.	Mar 2021 – Sep 2021
<i>Software Engineer</i>	<i>Phnom Penh, Cambodia</i>
- Designed and integrated secure RESTful APIs with third-party payment systems, improving transaction reliability by 30% and enabling seamless system integrations. - Developed and maintained backend services using C# and .NET, supporting ERP integrations and reducing manual operational workflows. - Optimized SQL queries and database performance, improving system efficiency by 20% and resolving data inconsistencies. - Improved reporting pipelines by redesigning data processing logic, reducing execution time from 30 minutes to a few minutes. - Provided debugging and troubleshooting for production systems using Azure Monitor logs and Kubernetes health checks, which kept system reliability high and reduced issue-resolution time.	

Anakut Digital Solution, Co. Ltd	Oct 2020 – May 2021
<i>Software Engineer</i>	<i>Phnom Penh, Cambodia</i>
- Developed scalable backend systems for POS and management platforms, reducing manual data entry errors by 99%. - Built and maintained RESTful APIs for ERP-integrated systems, enabling real-time data tracking and reporting. - Designed scheduling and booking services, improving system efficiency and reducing processing time by 50%. - Implemented real-time communication features using SignalR, improving user responsiveness by 45%. - Applied modular architecture and design patterns in ASP.NET Core projects, ensuring maintainable and scalable codebases that reduced future development effort.	

Arrow Dot	Oct 2019 – Oct 2020
<i>Software Engineer</i>	<i>Phnom Penh, Cambodia</i>
- Developed and deployed web applications using CI/CD pipelines, Docker, and Kubernetes, improving deployment reliability and reducing manual release effort. - Built and maintained backend services and APIs, improving database performance and overall system efficiency by 30%. - Collaborated with development teams through Git pull-request workflows, conducting code reviews and managing feature branches, which streamlined version control and reduced integration conflicts.	

PROJECTS

AI-Powered Portfolio	Feb 2025
Integrated LLM APIs to generate dynamic content, increasing user engagement by 35% for 150+ weekly users.	
Angkor Milk Meal App	Sep 2023
Optimized SQL queries and reporting features, improving performance and usability for 500+ users.	

EDUCATION

Maharishi International University	May 2024 – Dec 2026
Master of Science in Computer Science	Fairfield, IA, USA
Royal University of Phnom Penh	Nov 2016 – Nov 2020
Bachelor of Science in Computer Science & Engineering	Phnom Penh, Cambodia

HONORS

- Best Project & Team Effort of The Year – Khmer Care, Pathmazing Inc (06/2021)
